

The no inventory model eliminates the need for bulk ordering and wasteful spending. Our competitors claim to provide the same service, but don't fall prey to their empty promises. They outsource production resulting in back order problems, long lead times, inconsistent branding, and stick you with obsolete inventory.

Online Company Store Solutions

ADVANCED-ONLINE

THE MARKET

Production	You order it we make it, not the other way around. Store products are branded here in our facility, ensuring your brand standards are met with every order.	Inventory requirements. Limited product selection of on-demand products, if any. Outsourced decoration can cause inconsistent branding.
Lead Times	Quick 24 hour turn times. Order yesterday, it ships today!	Expect long lead times and back orders if products are not in inventory.
Order Requirements	No order minimums. Order just one.	For items not sitting in inventory, order minimums are required.
Product Selection	Over 3,000 apparel, print and promotional products all in one store and made here at Advanced-Online.	Limited product line. Most have to divide into two stores: one for print and the other for apparel and promotional products.
Controls	Controlled access, budgets, approval hierarchy are standard features.	If they say, "we plan to build that" or "we can do that", run! It takes years.
Backorders	Our backorder % is less than ¼ of 1%.	4% or more is the acceptable industry backorder rate.

ADVANCED-ONLINE®
A Follett Company

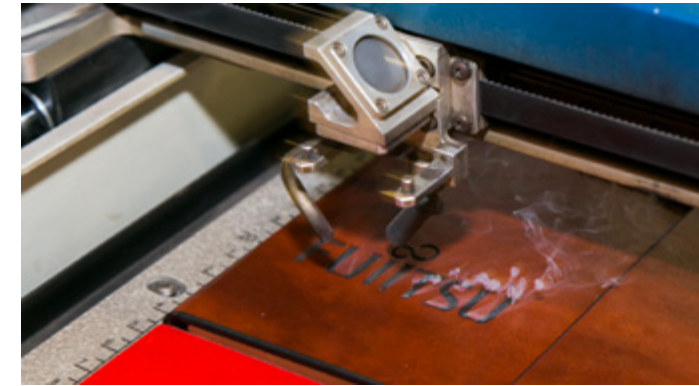

Advanced-Online is the only production facility in the country that can provide online stores with hundreds of products and no inventory.
